Blacksmithing and metalworking questions  
answered.

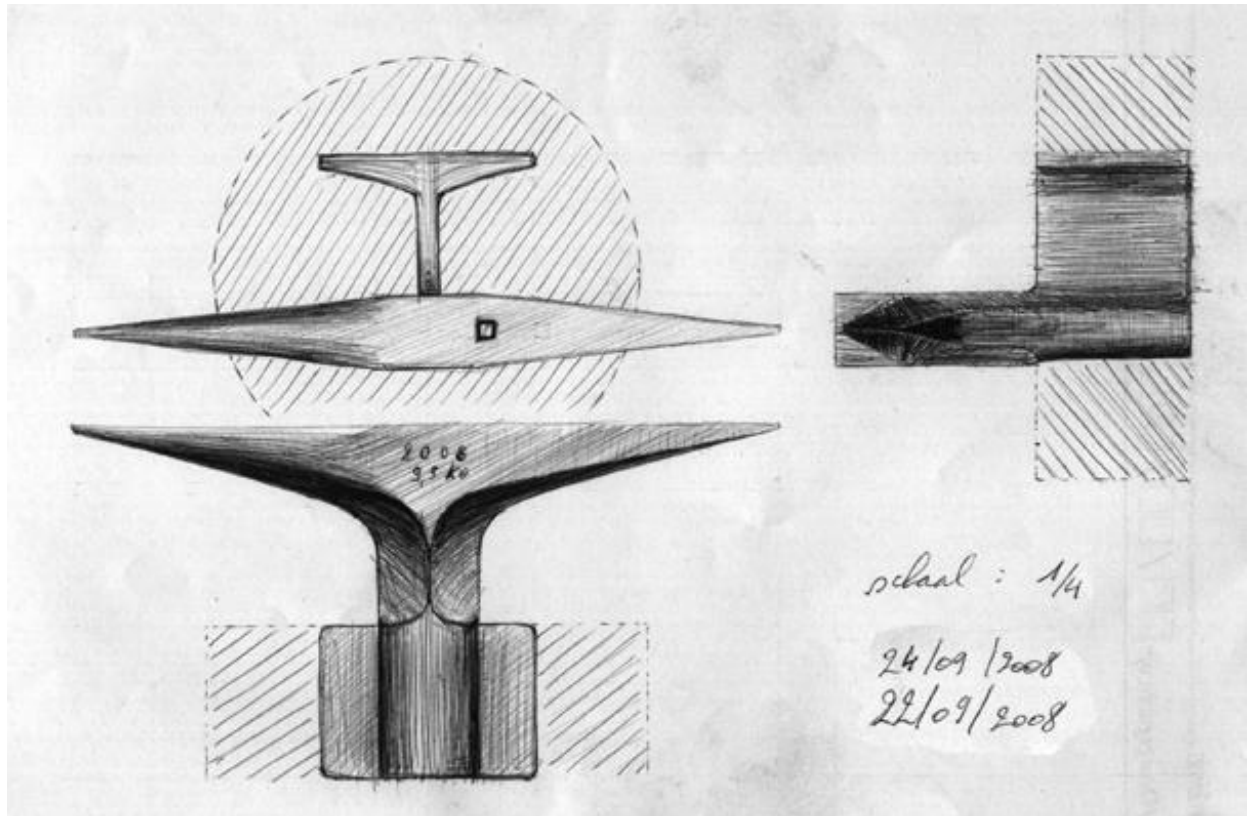

Anvil Making, Amboß, Amboss, l'enclume, incudine, el yunque, bigornia, städ, incus, aambeeld, batente

## Classic European and Original Anvil Designs

**The drawings** of Stefaan Meeus of Belgium show sensitivity to how iron moves and the European tradition of anvil manufacture. Many of these shapes are ancient the drawings reflecting the musings of the artist.

It took me a while to see the lower jaw sticking out to make an upsetting block on the anvil with the face. A hilariously creative use of characture in the design.

This is a stake anvil from RR-rail design by Stefaan. This is beautiful old school industrial design

**Also from Stefaan:**

**Stake anvil Realization by Stefaan Meeus**

Stake anvil made by Stefaan Meeus of Belgium in 2009.

**Maison de l'Outil (House of Tools) museum anvils** (38 anvils)

Photographs of over two dozen rare anvils, many never seen outside Europe until now.
